WORK EXPERIENCES

KPMG | Full-time
AI Software Engineer - Associate Consultant

May 2025 - Present
On-site • Bengaluru, KA

- Architected an ESG-focused RAG application utilizing **Azure AI Search**, Azure Blob Storage, and LangGraph for agent orchestration, enabling **semantic retrieval** and chat-based insights that accelerated decision-making.
- Implemented a FastAPI-based microservice to semantically index RFP documents and extract ESG-relevant signals with **90%+ labeling accuracy**, achieving a **40% reduction** in analyst review effort.
- Orchestrated an AI-driven workflow for automated tax compliance validation, resulting in a **65% decrease** in manual checks and a **40% improvement** in audit turnaround times.
- Developed LangGraph agents using MCP for natural language control of Gmail and Calendar, facilitating schedule retrieval, meeting booking, email sending, and automatic categorization, which led to a **50% increase** in task handling speed.

Technologies / Skills Used : Azure AI Search, Azure Blob Storage, LangGraph, FastAPI, React, DevOps

Eaton Corporation | Internship
Data Scientist

May 2024 - Jul 2024
On-site • Pune, MH

- Developed a PDF information extraction and processing algorithm for over 25 structured parameters using **NLP techniques**, entity recognition, and text classification.
- Generated an Infrastructure Diagram with 94% precision from the gathered data, following predefined rules.
- Achieved a 40% reduction in diagram generation time through effective **optimization techniques**.

Technologies / Skills Used : NLP, entity recognition, text classification

Logicwind | Internship
AI Engineer

Dec 2022 - May 2023
On-site • Surat, GJ

- Engineered **Computer Vision** projects featuring **real-time object detection** using 5+ **pre-trained models**, including YOLOv8, Detection2, and ResNet.
- Optimised algorithms and documentation, achieving a **200ms reduction** in response time.
- Designed and implemented an **MLOps pipeline** with Docker, DVC, and Kubernetes for **scalable and automated model deployment**.

Technologies / Skills Used : YOLOv8, Docker, Kubernetes

SKILLS

Databases :	MongoDB, MySQL, SQLite, PostgreSQL
Frameworks & Libraries :	PyTorch, TensorFlow, FastAPI, Langchain, Langgraph, React
Programming Languages :	Python, C++, JavaScript, MySQL, SQL
Soft Skills :	Communication, Teamwork, Problem Solving, Critical Thinking
Tools & Platforms :	Docker, Linux, Azure, AWS, Kubernetes, MLFlow, CI/CD tools, DockerHub, GitHub, Keras, VSCode, Git

EDUCATIONS

Year	Degree	Institute	CGPA/MARKS
Jul 2023 - May 2025	Master of Technology in Computer Science (Artificial Intelligence)	Netaji Subhas University Of Technology	8.46
Jun 2019 - May 2023	Bachelor of Technology in Computer Science	Uka Tarsadia University	8.9
